

EX NO: 12

MINI PROJECT: SHOPPING MART APPLICATION

AIM

To develop a java application for Purchasing and Billing the products with email notification.

PROCEDURE

1. Create the class Class1 which contains all the information of the product, buttons, text fields etc.
2. Create the class Shopping which defined the layout and visibility of panel etc, with buttons aligned.
3. Create the class UserMail which sends OTP to confirm mail id and sends the bill after purchase.
4. Create the class UserName which gets the name, mail id, of the customer.
5. The program will be multilevel inherited as UserMail <- UserName <- Class1 <- Shopping (Base Class to Derived class).

PROGRAM

////////////////////<CLASS USERMAIL><Starts>////////////////////

package Shop;

import java.util.Properties;

import java.util.Random;

import javax.mail.*;

import javax.mail.internet.*;

public class UserMail

{

//final String user;

public final String user="***"; //FOR PRIVACY REASONS USERNAME HAS BEEN OMITTED**

public final String password="*"; //FOR PRIVACY REASONS PASSWORD HAS BEEN OMITTED

/*

CONDITIONS

All features of this application can be used or shown only by the programmer. Since this application contains mailing feature, for privacy reasons mail-id and password are removed here. Running this application without adding mail id and password will through error.

*/

```

/////////////////<CLASS SHOPPING ><Ends>////////////////

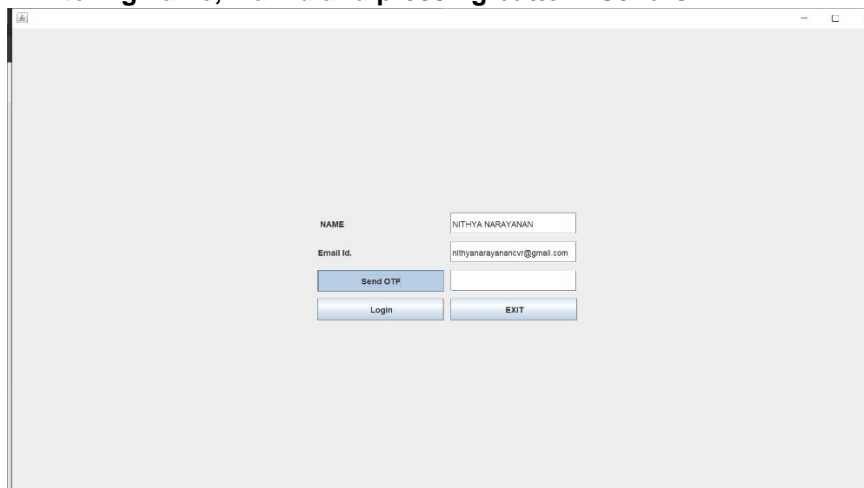

OUTPUT

1.Login Page

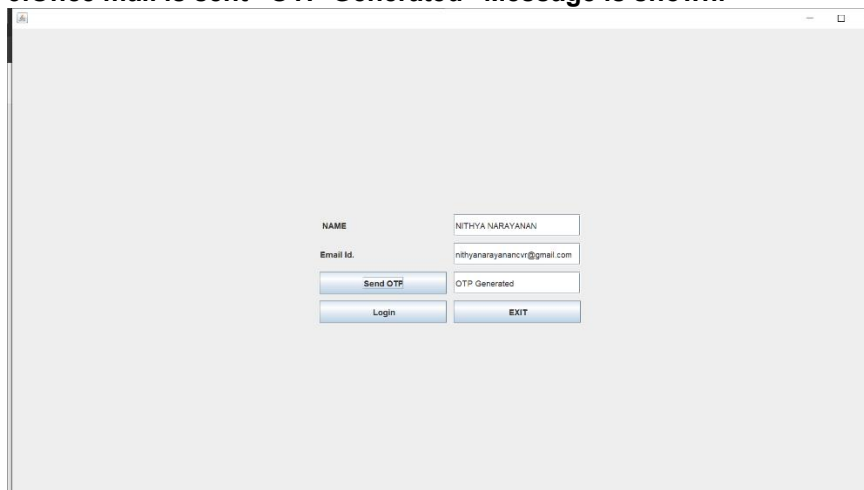

A screenshot of a web application window titled "Login Page". The window has a light gray background. In the center, there is a login form with the following elements: a label "NAME" followed by a text input field; a label "Email Id." followed by a text input field; a "Send OTP" button; a "Login" button; and an "EXIT" button. The "Send OTP" button is positioned to the left of a third text input field.

2.Entering name, mail id and pressing button "Send OTP".

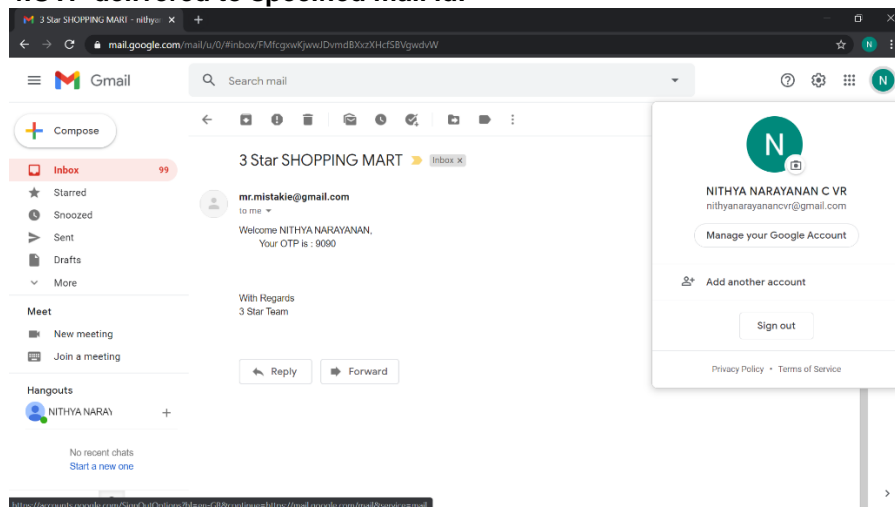

A screenshot of the same web application window. The "NAME" field now contains the text "NITHYA NARAYANAN". The "Email Id." field now contains the text "nithyanarayanncvt@gmail.com". The "Send OTP" button is highlighted in blue, indicating it has been pressed.

3.Once mail is sent "OTP Generated" Message is shown.

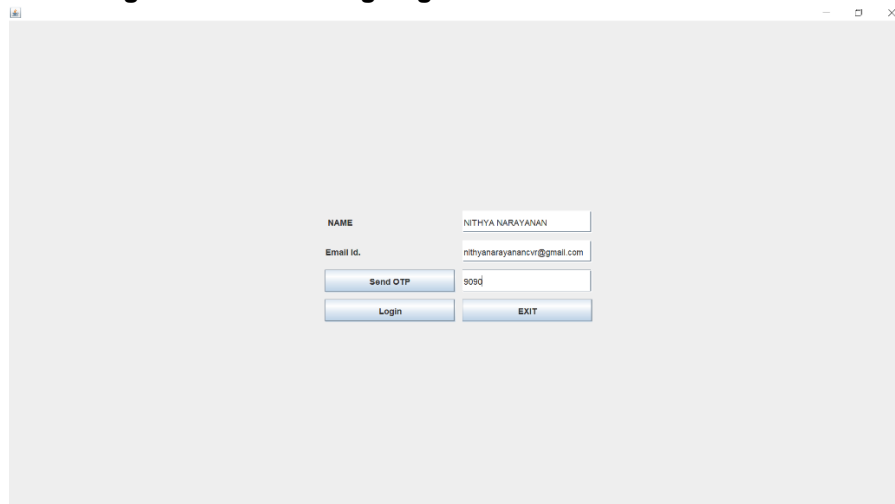

A screenshot of the same web application window. The "NAME" field contains "NITHYA NARAYANAN" and the "Email Id." field contains "nithyanarayanncvt@gmail.com". The "Send OTP" button is highlighted in blue. To the right of the "Send OTP" button, the text "OTP Generated" is displayed in a text input field. The "Login" and "EXIT" buttons are also visible.

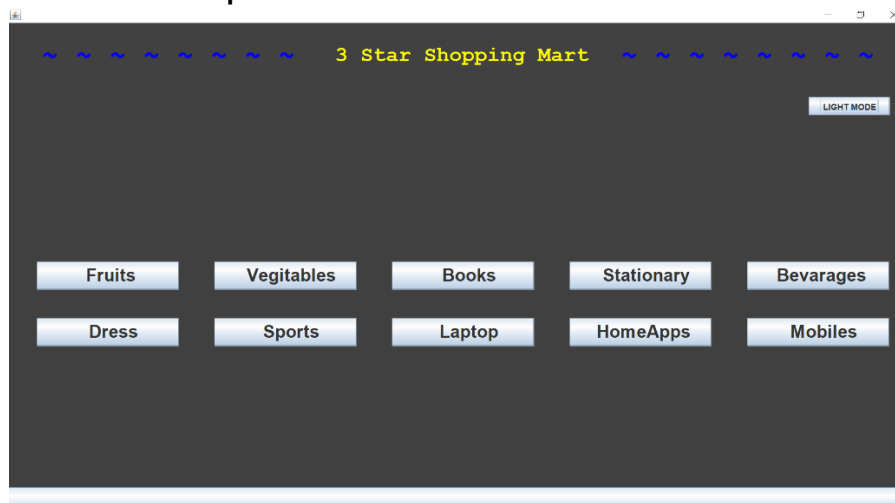

4.OTP delivered to specified mail id.

5.Entering OTP and Pressing Login Button.

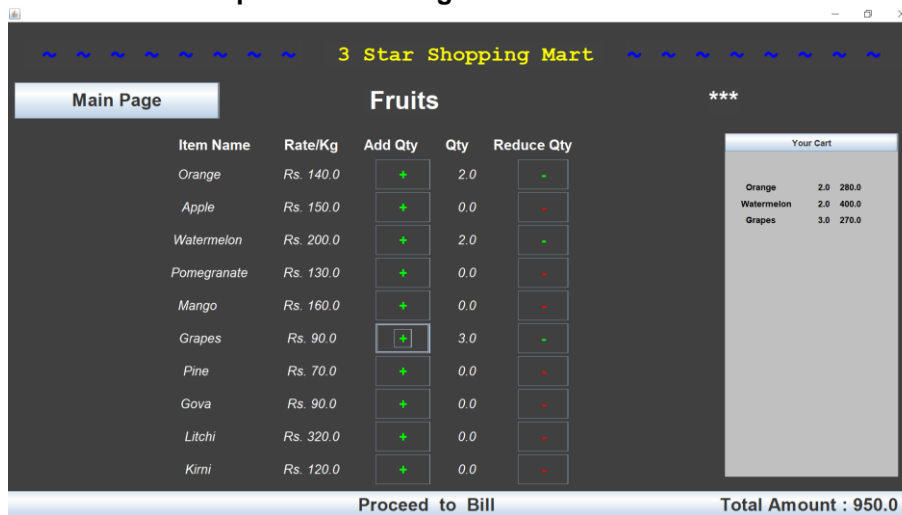

6.Main Menu is Opened

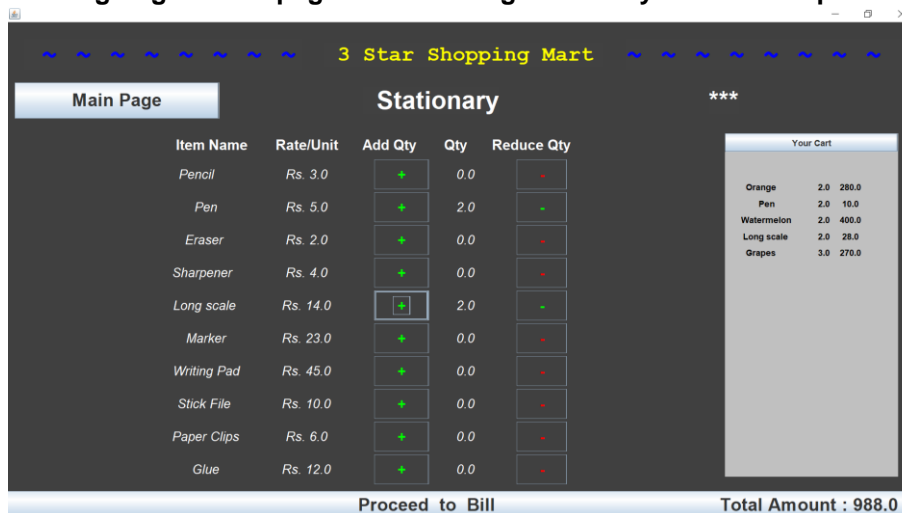

7. Clicking Fruits section

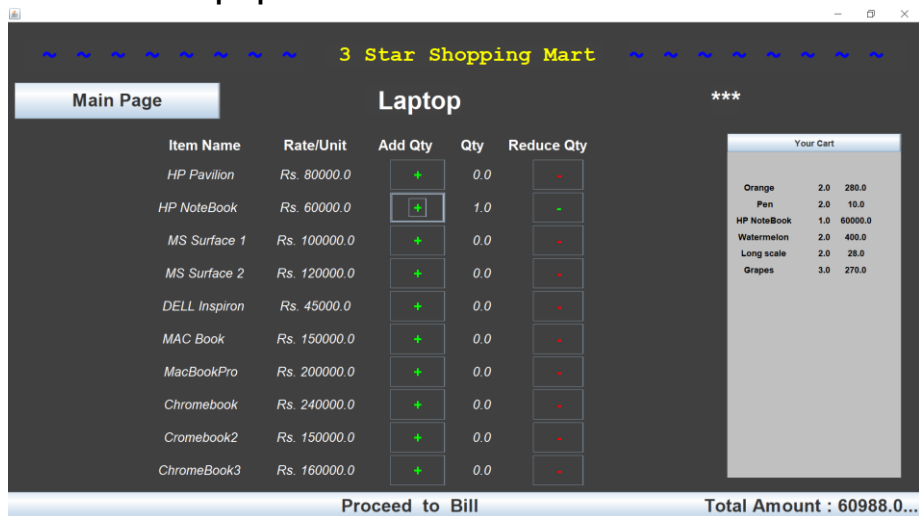

8. Fruits Section Opens and Adding Items to Cart.

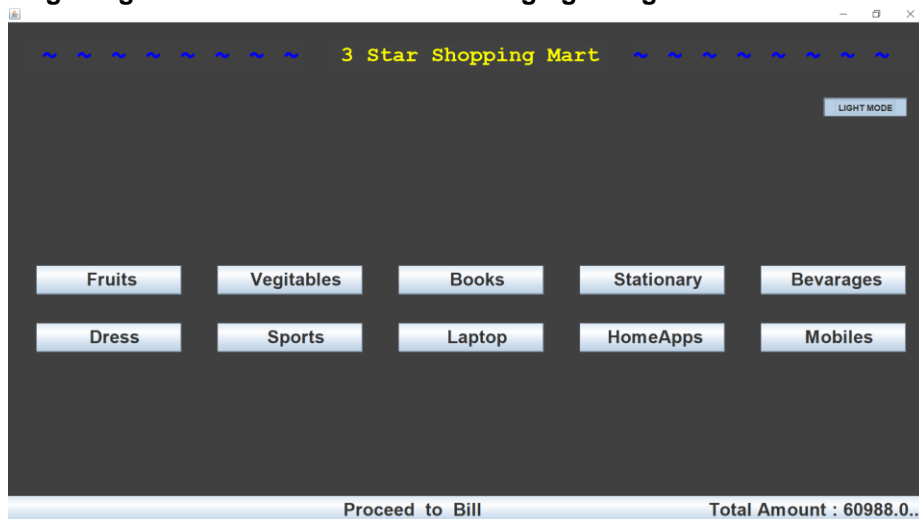

9. Now going to main page and selecting Stationary section and proceeding Shopping.

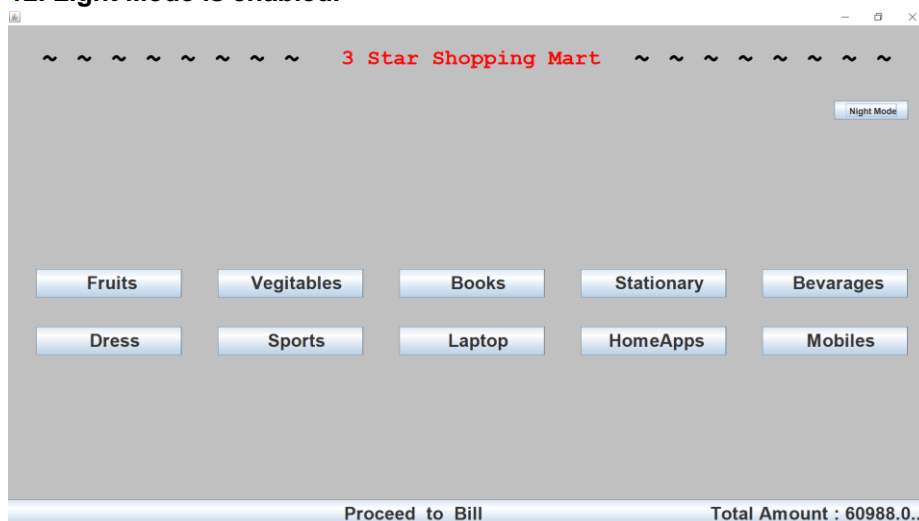

10. Enter into Laptop Section

11.getting back to MAIN MENU and changing to Light Mode

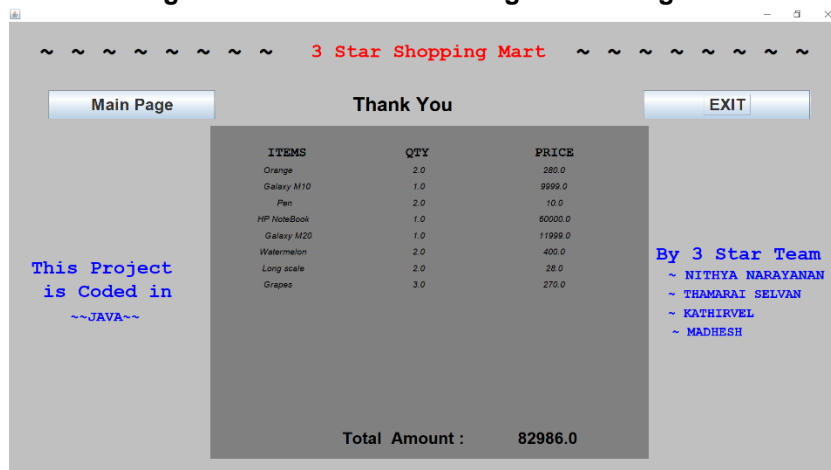

12. Light Mode is enabled.

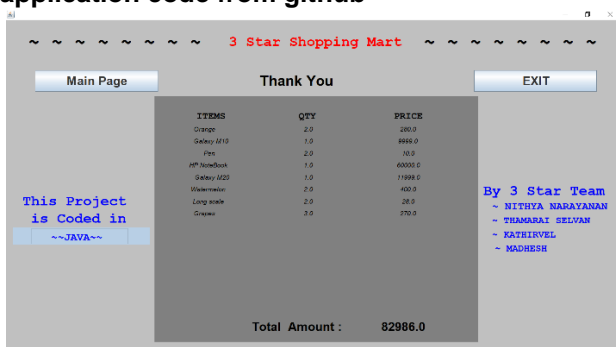

13. Now purchasing in mobile in light mode.

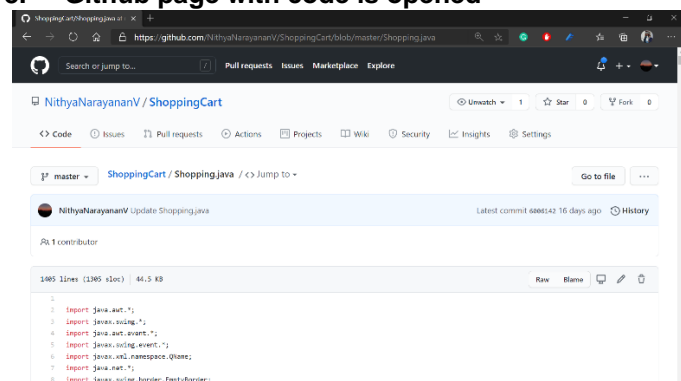

1. Pressing “Proceed to Bill” we can get to BillPage.

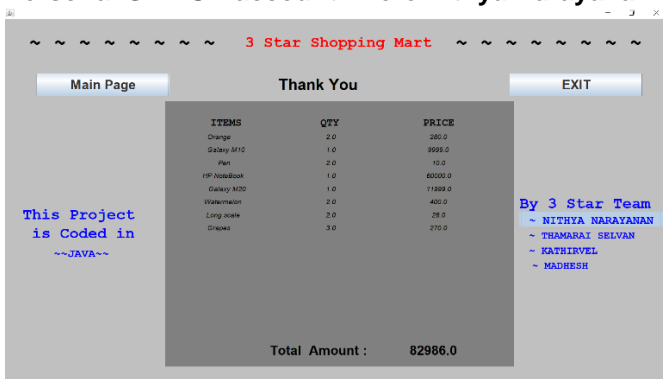

2. By pressing JAVA we can get this application code from github

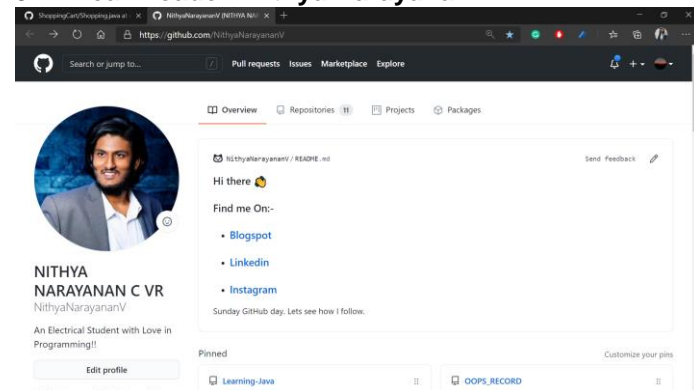

3. Github page with code is opened

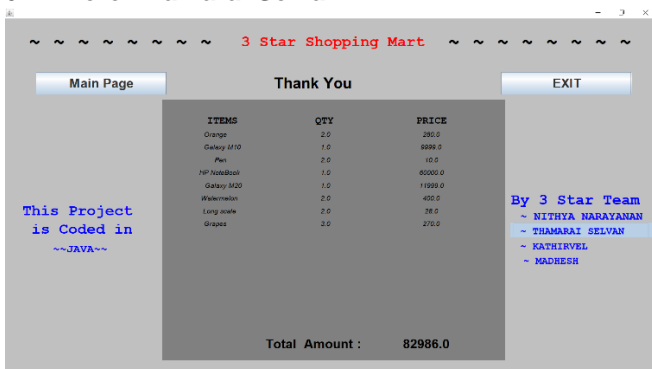

4. By pressing names we can see the Team Personal GITHUB account. Here Nithya Narayanan

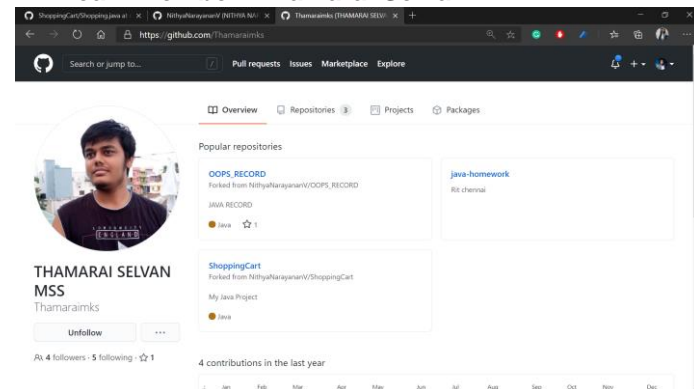

5. Team leader :Nithya Narayanan

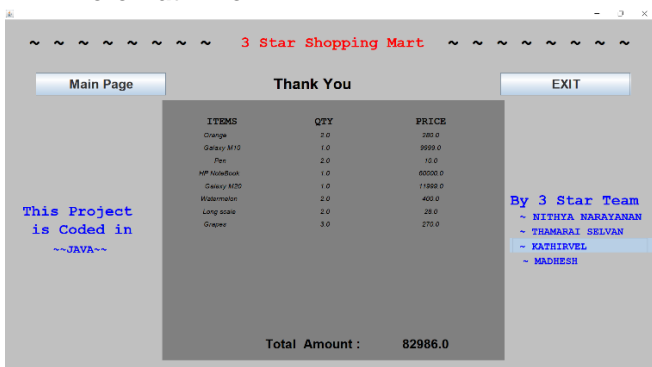

6. Here Thamarai Selvan

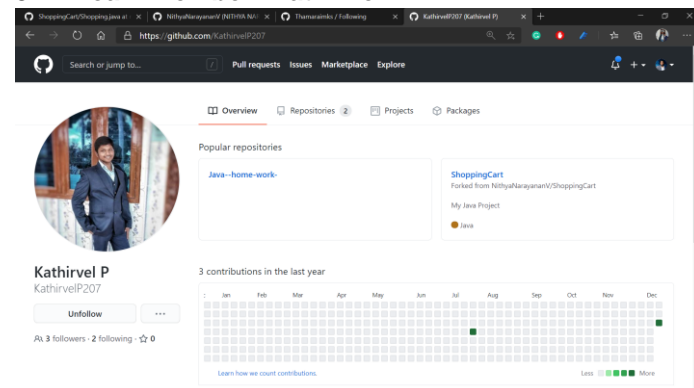

21. Team Member: Thamarai Selvan

7. Here Kathirvel

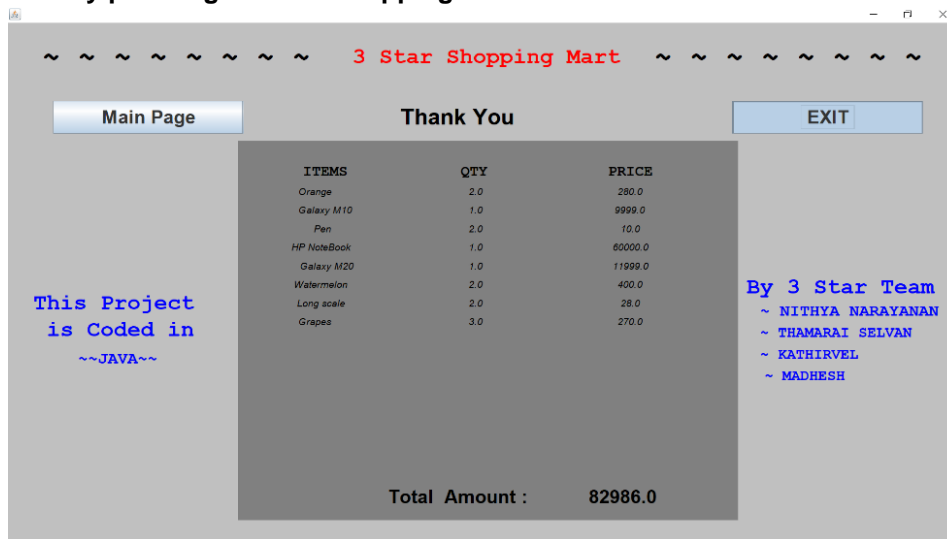

8. Team Member: Kathirvel

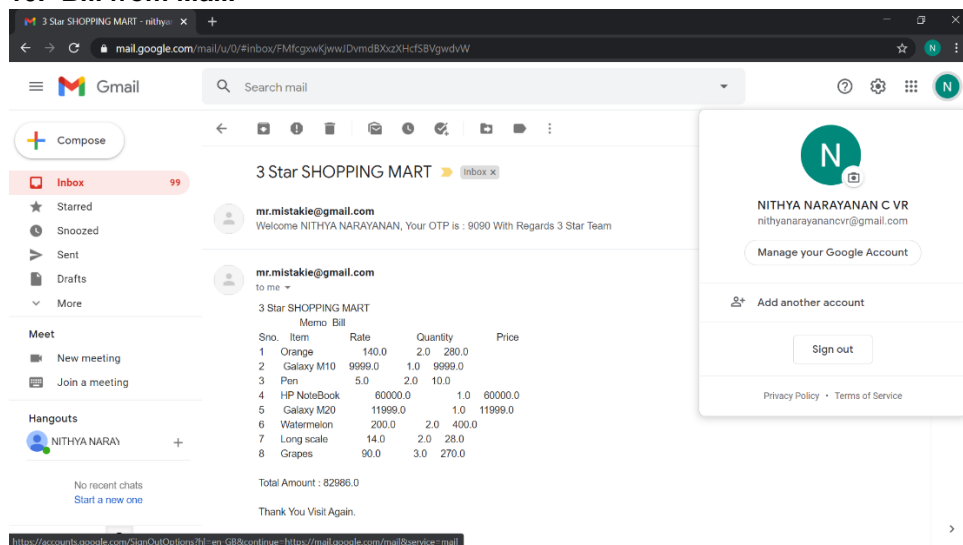

*Team Member Madhesh Does not have a GitHub Account.

9. By pressing Exit the Shopping can be ended and bill will be mailed

10. Bill from Mail.

RESULT

Thus, a java application has been developed for Purchasing and Billing the products with email notification.
